Detailed Action

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Beverly Hjorth on 9/9/08.

The application has been amended as follows:

Claims 19-21 are cancelled.

Allowable Subject Matter

Claims 1-18 are allowed.

The following is an examiner's statement of reasons for allowance: The present invention generally discloses automated financial transactions using an interactive voice response for debiting and settling emergency cash transactions. The prior arts of record include the teaching of Sandretto (US 5,812,988) and Rotella (US 4,677,933). Sandretto teaches creating a portfolio by: (1) estimating an initial set of cash flows for each asset in a set of two or more assets using known or conventional methods; (2) generate additional estimated cash flows based upon different estimates for one or more economic variables; (3) adjust the original set of cash flows and each additional set of cash flows for expected inflation; (4) determine an initial input risk measure for each asset based on a risk-return type asset pricing model; (5) determine an initial

discount rate for each asset using the initial input risk measure for each asset and using different economic variables that relate to each set of cash flows. On the other hand, Rotella teaches stock price tracking for tracking a plurality of stop loss orders. However, the prior arts of record fail to teach, singly or in combination, determining a point risk value of the instrument, the point risk value comprising an intermediate value multiplied by the number of shares or contracts, the intermediate value comprising the market price minus the stop-loss price for a long transaction or the market price plus the stop-loss price for a short transaction; determining a number of shares or contracts held or to be held in the portfolio or the account associated with the point risk value for a selected size risk value, the number determined by multiplying the selected size risk value by the equity value and dividing by the point risk value.

The examiner agrees with the applicants' arguments presented in the remarks of August 8, 2008 and has withdrawn the rejection under 35 USC 103 over Sandretto (US 5,812,988) in view of Rotella (US 4,677,933). The prior arts of records taken singly or in combination fail to teach or fairly suggest the claimed invention. Therefore, the examiner favors the allowance of claims 1-18.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
